下面的短文后列出了 10 个句子, 请根据短文的内容对每个句子作出判断: 如果该句提供的是正确信息, 选择 A; 如果该句提供的是错误信息, 选择 B; 如果该句的信息文中没有提及, 选择 C。在答题纸相应位置上将答案选项涂黑。

Australia

Australia was a country I always wanted to visit. This year I saved up some money and booked a flight to go travelling. I had some friends studying there, so it was a perfect opportunity to see friends and travel around.

The flight made me realize exactly how far away Australia is from home. I spent 10 hours flying from London to Hong Kong, then a further 8 hours to Sydney, my first stop in Australia. The flight went quite quickly though, since there were lots of films to keep me entertained.

When I arrived, I felt strange. Everything was upside down over there. It was the start of winter in May! Fortunately, for me the weather was still warm and sunny. It also took me a while to get used to the time difference.

Australia is truly beautiful. It is full of views and wildlife you would not find anywhere else in the world. One of the highlights of my trip was visiting a koala (考拉) reserve in Brisbane. There were koalas everywhere sleeping in the trees. I even got a chance to hold one. I learnt lots of facts about koalas too. They can sleep for up to 22 hours a day to save energy!

At the reserve there was also a big lawn full of kangaroos (袋鼠). We were allowed to feed and touch them. They were really cute and friendly.

I loved visiting Australia, from the mountains and waterfalls in the National Parks to the long white sandy beaches. It's an incredible country and worth visiting. I'm already dreaming of going back!

第二部分：阅读选择（第 11~15 题，每题 2 分，共 10 分）

阅读下面短文，请从短文后所给各题的 4 个选项（A、B、C、D）中选出 1 个最佳选项，并在答题纸相应位置上将该项涂黑。

Veganism

Veganism. What does it mean? To some of you it might be a completely new word. And it's certainly a word I have only become familiar with in recent years. A vegan diet is one that contains no animal products. That means no meat, no milk, no eggs, etc.

I became interested in the vegan lifestyle months ago. As I was surfing videos on the Internet, I came across a woman called Freelee. She claimed to regularly eat around fifty bananas a day to stay healthy. Fifty bananas! I quickly realised that this was not the diet for me. However, what she was saying about veganism did pique my interest. And I went on to watch many more vegan videos. Eventually, I switched to veganism about six months ago.

My diet at the moment is split roughly equally between fruit and grains such as rice and potatoes. In a typical day, I start off with a fruit drink made of bananas, berries and orange juice. For lunch I typically have potato fries with a sweet sauce. For dinner I normally have rice with a tomato sauce and some vegetables. I even make tasty vegan puddings. One of my favourites is coconut cream mixed with chocolate powder and sugar.

While veganism is often associated with physical weakness, that is certainly not the case for me. I have discovered many delicious vegan products, which one might never consider as vegan.

Personally, eating this way has given me a much more positive outlook on life. Another vegan Kristina's story is even more amazing. Kristina was bitten by a deadly spider. She was not given the medicines required to survive the bite. Yet she made a full and speedy recovery. She attributes it to the magic power of a vegan lifestyle.

11. According to Paragraph 1, a vegan diet is _____.

- A. advised by food experts B. familiar to most people
C. followed by many people D. free from animal products

12. The author knew the vegan lifestyle through _____.

- A. online videos B. her friends C. vegan books D. TV programs

13. The word "pique" (Para. 2) probably means "_____."

- A. express B. arouse C. expand D. protect

14. The author believes that her vegan diet is _____.
A. healthy B. cheap C. sugar-free D. low-salt
15. Kristina is mentioned because she _____.
A. attracted a lot of fans B. had a positive attitude toward life
C. went on a special fruit-based diet D. quickly recovered from a spider bite

第三部分：概括段落大意和补全句子（第 16~25 题，每题 1 分，共 10 分）

阅读下面短文，请完成短文后的 2 项测试任务：（1）从第 16~20 题后所给的 6 个选项中为第①~⑤段每段选择 1 个正确的小标题；（2）从第 21~25 题后所给的 6 个选项中选择 5 个正确选项，分别完成每个句子。在答题纸相应位置上将答案选项涂黑。

Bottled Water

- ① Over the last 15 years, more and more people in the US have been drinking bottled water. There is no sign of slowing down. In fact, sales of bottled water are going up faster than any other kind of drink. It is true even in cities where it is safe to drink tap water. This has been a disaster for the environment and for our health.
- ② Most bottled water comes from underground water. Much of this underground water could have flowed into rivers and lakes. Using this water can make droughts (干旱) more serious. Many companies use water from mountain glaciers (冰川), but this is not much better. When the glacier melts, the water usually flows to areas like rivers or wetlands. When companies take glacier water, they take it from areas that need it.
- ③ It takes about 1.6 liters of water to make one liter of bottled water. This wastes a lot of water. Also transporting the bottled water to stores burns fuel and creates pollution. The problems do not stop when the water reaches people who buy it. Water bottles are made from plastic which does not break down. Although it can be recycled, people usually do not put it in the recycle can.
- ④ Some may say that bottled water is safer and healthier than tap water. But that is not true. Sometimes chemicals or bacteria get into bottled water, and companies have to destroy them. Actually, tap water is often healthier than bottled water. Bottled water may lack fluoride (氟化物) which helps protect our teeth. Fluoride is found in tiny amounts in tap water.

⑤ Obviously, more people need to know that tap water is safer and healthier. Unfortunately, tap water cannot advertise itself. When a product that is cheaper and better does not win, that is bad news. When the product is water, we all lose.

Task 1

- 16. Paragraph ①:

Bird Maps and Compasses (罗盘)

Every year hundreds of species of birds take long trips. 26 In the fall, they fly to warmer climates where food is plentiful all winter. When spring comes, they fly back to raise their young where they were born. For a long time people wondered where the birds went and what routes they took.

Researchers now know that migrating birds are guided by their own sorts of maps and compasses. But it has taken many decades to uncover the secrets of these navigation (导航) tools. In the 1800s, scientists started putting bands around birds' legs. 27 When people found the banded birds, they contacted the person named on the band and told him where and when they had found the bird. In this simple way, scientists learned a lot about where birds traveled, where they stopped, and how fast they moved.

Today scientists still put bands on birds' legs. They also use new ways of tracking birds such as airplanes, computers, and satellites. 28

Birds often migrate in groups. You may have seen Canada geese flying high in the sky in a V-form. Young birds follow their parents. 29 They may follow a river and remember what it looks like. Also, birds use the position of the sun and stars as a compass to find their way.

30 Chemicals in their brains allow them to sense the magnetic field and travel in the right direction. But scientists are still researching how this happens. They think some birds may actually be able to see the earth's magnetic field.

- A. The bands contained a name and address.

B. Birds use the earth's magnetic field to navigate too.

C. A map and a compass are often helpful for long trips.

D. They fly thousands of miles from one home to another.

E. They learn the route that the older geese have traveled before.

F. They have answered many questions about how birds navigate.
